

By High Matters

Please note the key features related to vehicle color customization:

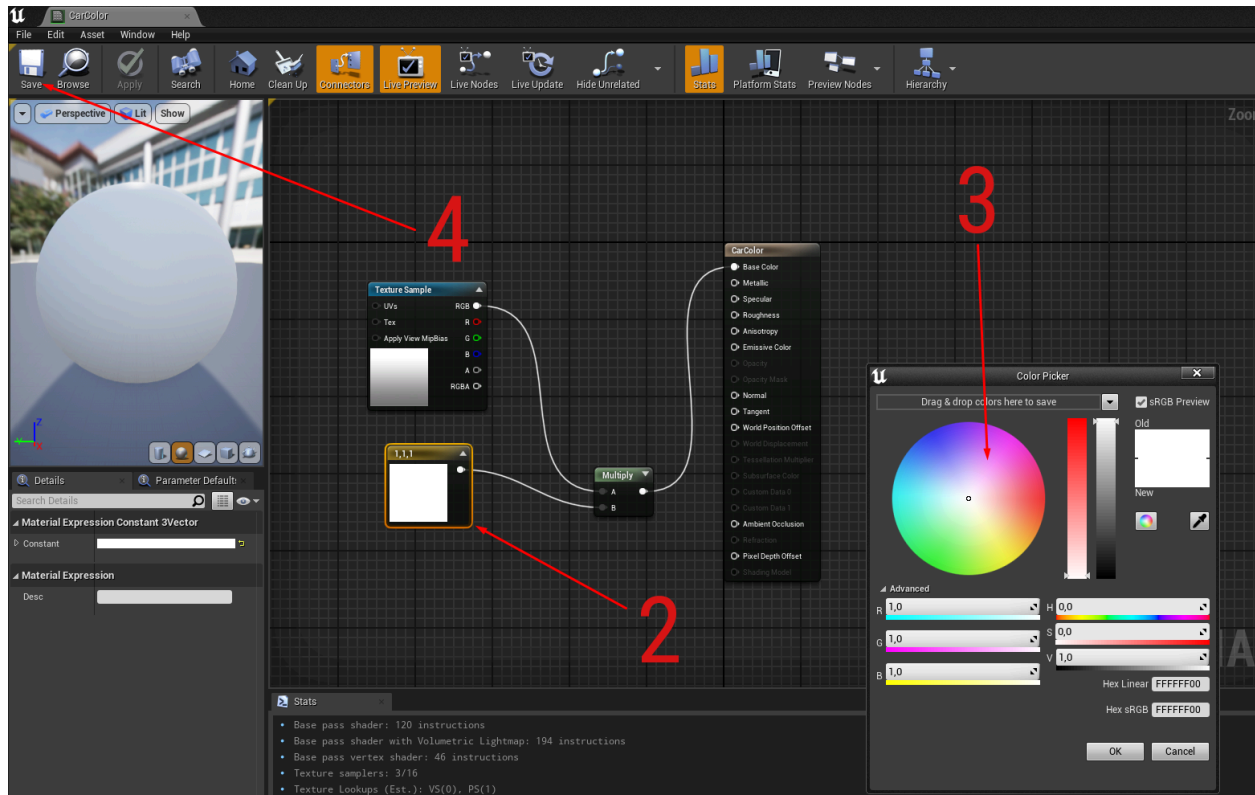

- The car features a gradient paint finish by default
- You may change the color to any other shade of your choice
- The process requires only a few simple steps
- Please note: This option is not available for taxis or police vehicles

Steps:

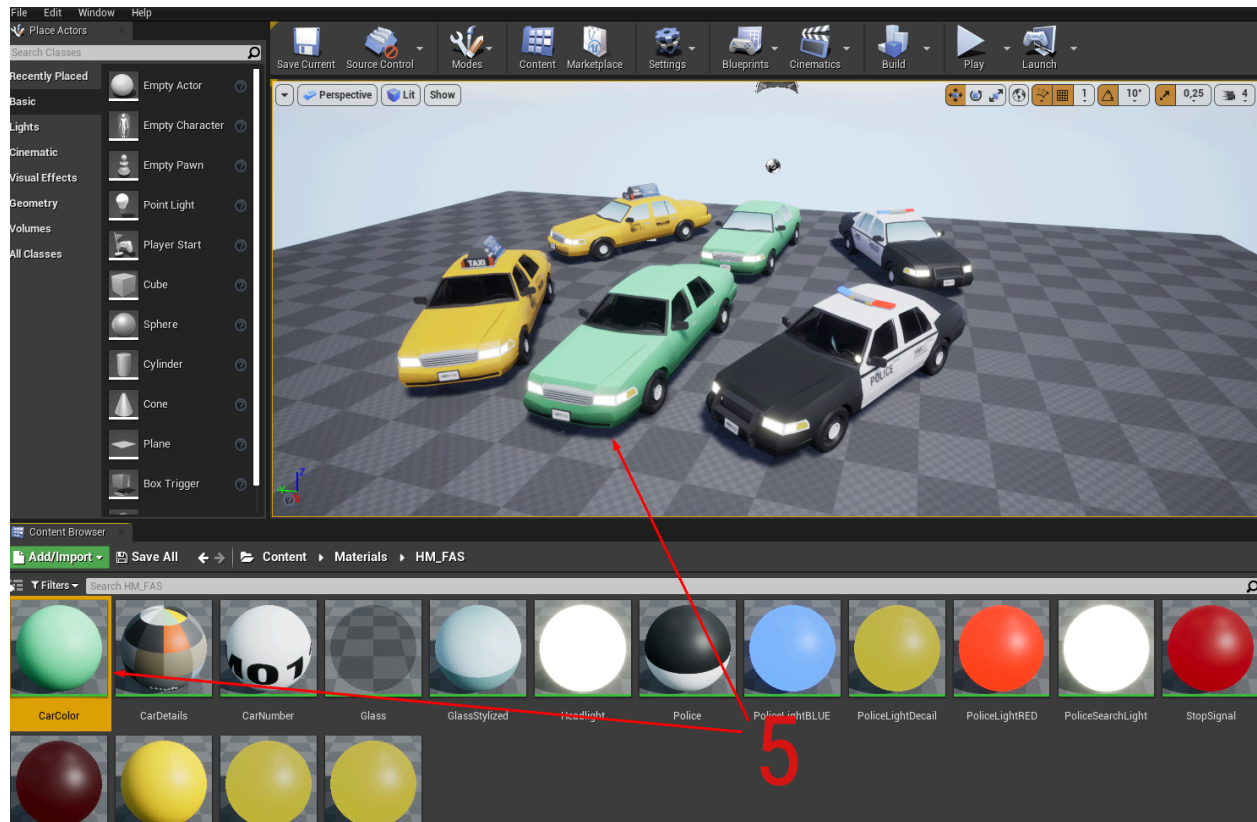

1) Double click on the material.
A new window will open.

- 2) Double click on the constant.
- 3) A new color selection window will open. Choose any color. It will be mixed with the gradient. (Click the OK button)
- 4) Be sure to click the "save" button for the material to be applied.

5) Your material will change color.
